

PRODUCT INSTRUCTIONS

Instruction for opening the case

Open the case as indicated below.

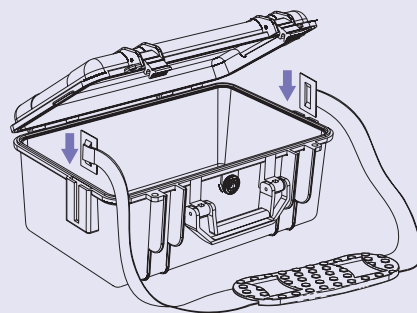

1 Open the lock

1 Push the button down

2 Open the lock

Usage of the shoulder strap

Open the case. Slide the metal parts into the designated slots and press down to secure.

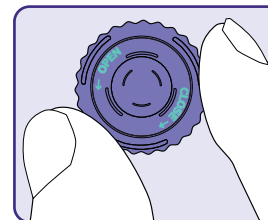

*Not all cases are equipped with a shoulder strap.

Pressure-balancing valve

Pressure differences can affect opening.

The valve balances internal and external pressure, making the case easy to open.

How does it work?

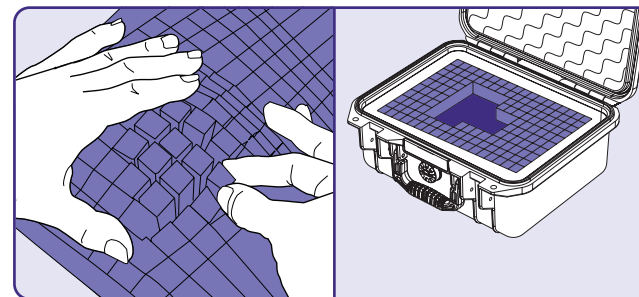

Turn counterclockwise to open.
Turn clockwise to close.

*Do not overtighten the rotary knob.

How to use Pick and Pluck foam

Place the item on the pre-cubed foam. Trace the outline and remove the foam cubes within the marked area.

Be careful not to remove more foam than necessary.

YOUR GEAR. OUR GUARD.

Maintaining durability

- Ensure the lid is clean to maintain an effective seal.
- Only use a damp cloth to clean the case.
- Do not use alcohol or solvents containing chemical components, as they may damage the surface.
- Solvents such as ketones, lipids, and chlorinated hydrocarbons can corrode the ABS material.
- Keep away from extreme heat to prevent damage, deformation, or discoloration.
- Keep away from children.

IP67 - Dust and waterproof

Always check the quality and water resistance before use. Over time, quality will inevitably deteriorate due to deformation, dirt, and usage. Therefore, inspect it regularly.
