

THE PROFESSIONAL'S CHOICE

MegaTape

MEGATAPE

The professionals' choice

Performances, trade fairs, corporate events or TV recordings.
Our tapes are developed by and for the event industry. A tape for your stage, cable or truss.

In the world of live events, reliability isn't a luxury - it's a must. At MegaTape, we understand that better than anyone. With over 50 years of experience and a strong focus on the entertainment industry, we know exactly what's needed on the ground.

Our tapes are developed in close collaboration with the people who use them: stage builders, technicians, production crews and rental companies. The result? Products that don't just perform - they deliver under pressure. From strong gaffer tapes and flexible PVC tapes to specialised double-sided tapes - MegaTape offers a solution for every application.

Why professionals choose MegaTape:

- Reliable quality
- Smart applications
- Flexibility
- Innovation

We choose quality, innovation and ease of use - and we continuously listen to the needs of the industry.

GAFFER TAPE

MegaTape Gaffer tape, the perfect solution for every event professional.

Thanks to our many years of experience, we understand the crucial importance of high-quality gaffer tapes in the event industry. Securing cables, avoiding reflections, markings on stages and other applications.

Theaters, film sets, corporate events... our gaffer tapes are the solution. Our gaffer tapes tear easily in all directions, have a high-quality adhesive layer and can be removed without leaving adhesive residues.

MegaTape MCT 300

The MCT 300 is our most versatile gaffer tape - strong, reliable, and built for any situation on and around the stage. From hiding cables to securing molton or floor coverings: this tape handles it all. Its high tack and clean removal make it a favourite among professionals in theatre, live events and productions. Available in various colours, widths and lengths.

- tearable by hand
- water-proof
- remove without a trace
- medium adhesion
- glossy

MegaTape UT80 Matt

The UT80 is the go-to matt gaffer tape for professionals who need zero reflection on set, stage or studio floors. With strong adhesion and an easy-tear design, it applies quickly and removes just as cleanly - without any adhesive residue. Its ultra-matt finish ensures a discreet, low-profile look under lighting. Always low-profile, always reliable.

MegaTape UT120 Matt writable

The UT120 Matt is a writable tape, perfect for marking flight cases, desks or stage floors. Its special surface coating keeps ink in place - even in damp or rainy conditions. Ideal for anyone who wants to label gear discreetly, without the flashy look of fluorescent tape. Easy to tear by hand, strong adhesion, and clean removal. Available in black, white and grey.

Width	Length	Packaging unit	Colors												
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- parant	Yellow	Yellow/ Black	Glow in the dark

Fluor tapes that get noticed

Whether you need to mark, label or simply stand out - our fluorescent tapes do the job. From bright pink to neon green, there's a wide range of colours and widths to choose from. Available as standard fluor tape or with a writable surface - perfect for flight cases, cables or floor markings. Highly visible, even in low-light environments.

MegaTape UT70 Fluor

The UT70 Fluor gaffer tape is a bold, high-visibility tape that's perfect for marking flight cases, stages and backstage areas - indoors or out. With strong adhesion and water resistance, it stays in place under all conditions. Easy to tear by hand and clean to remove when used correctly. Available in four fluorescent colours and three standard widths.

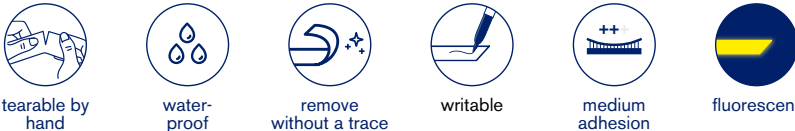

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- parant	Yellow	Yellow/ Black	Glow in the dark

25 mm	25 mtr	24 rolls			●		●	●				●		
50 mm	25 mtr	12 rolls			●		●	●				●		

MegaTape UT120 Fluor writable

A bright, writable fluorescent tape designed for marking on stage floors or flight cases. The UT120 combines all the qualities of a high-visibility fluor tape with a writable surface that holds ink - even in damp conditions. Want to colour-code your flight cases and label them at the same time? This is the tape you need.

Width	Length	Packaging unit	Colors

50 mm	25 mtr	12 rolls		●	●		●	●				●			

PVC TAPE

PVC tapes that keep up with the pressure on the floor

Our PVC tapes are a go-to for crews, techs and production teams when it comes to taping down dance floors, stage areas or cables. The matt finish ensures no glare under lights or on camera. They tear easily by hand, lay down flat and come in a variety of core sizes, widths and colours. The rigid plastic core holds its shape - even in the middle of a hectic setup. Whether you're finishing floors, securing cables or marking positions - our PVC tapes are always ready to roll.

MegaTape UT4

The UT4 is a compact PVC tape designed for securing cables to truss. It has a matt finish and leaves no residue when used correctly. But the real game-changer? It breaks incredibly easily. Ideal during setup - and even more so during breakdown. One quick wrap around the truss and cable, and you can pull the cable free without damage. Thanks to the rigid plastic core, the tape keeps its shape even in the messiest builds. Easily recognised by its green core - a timesaver when things get hectic.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Tran-sparant	Yellow	Yellow/Black	Glow in the dark
19 mm	20 mtr	48 rolls	●			●				○				

MegaTape UT5

The UT5 is a matt PVC tape with a large cardboard core, specially designed for clean, precise taping of dance floors and studio stages. Its stiffness and ability to tear straight make it perfect for covering long distances without twisting or creasing. The matt finish prevents unwanted reflections - a favourite in TV productions. Thanks to its clean tear, the UT5 is sometimes even used as a lightweight alternative to gaffer tape.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- sparant	Yellow	Yellow/ Black	Glow in the dark
50 mm	33 mtr	36 rolls	●			●				○	○			

MegaTape UT7

The UT7 is a matt PVC tape with a sturdy plastic core and just a bit more stretch than the UT4. That makes it ideal for bundling and neatly routing cables on stage. It tears easily by hand, leaves no adhesive residue when used correctly, and is available in multiple widths and lengths. The 50 mm version is also a popular choice in theatres for taping down dance floors - thanks to its clean tear and flexibility. Easily recognised by its white core.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- sparant	Yellow	Yellow/ Black	Glow in the dark

UT4 PVC tape

Our most popular product

- Built on durable plastic cores
- Easy to tear without tools
- Matt finish

DOUBLE-SIDED TAPE

Double-sided tapes that stick with you

From trade shows to temporary builds - our double-sided tapes keep carpets and materials exactly where you want them. Choose high/low tack for delicate floors, or permanent grip for rougher surfaces.

Clean removal where needed, and lasting hold where it counts. Available in various materials, widths and adhesive strengths - built to match the pace of live events.

MegaTape 410 Double-sided removable expotape

The 410 is a double-sided PE tape with a high/low tack adhesive: strong on the top side, gentle underneath. It's ideal for temporarily securing expo carpet on sensitive surfaces like historical floors. Easy to tear by hand and clean to remove without leaving a trace. Built for event crews who need to work fast, clean and safely.

tearable by hand

remove without a trace

high/low adhesion

25 mm	25 mtr	54 rolls			●									
25 mm	50 mtr	30 rolls			●									
50 mm	25 mtr	27 rolls			●									

MegaTape 420 Double-sided

The 420 is a double-sided PP tape with a powerful high/low tack adhesive. Its permanent top layer keeps expo carpet firmly in place, while the lightly adhesive underside protects delicate floors like parquet. Just like the 410, it tears easily by hand - ideal for fast, efficient work on location.

Width	Length	Packaging unit	Colors

19 mm	25 mtr	30 rolls										●		
25 mm	25 mtr	27 rolls										●		

MegaTape 450 Double-sided

The 450 is a double-sided cloth tape with a strong high/low tack adhesive, specially designed for rough or uneven surfaces like those found in exhibition halls. Its high-tack top layer keeps carpet firmly in place, while the low-tack underside allows for clean removal without residue. The cloth material makes it easy to tear by hand and suitable for heavy-duty use.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans-parant	Yellow	Yellow/Black	Glow in the dark

20 mm	50 mtr	28 rolls									○			
38 mm	50 mtr	16 rolls									○			

MegaTape 460 Double-sided cloth

The 460 is a double-sided cloth tape with permanent adhesive on both sides, developed for situations where maximum bonding strength is essential. It holds firm, even on rough or challenging surfaces. Easy to tear by hand and straightforward to use. For applications where clean removal is key, the MegaTape 450 is a more suitable option.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans-parant	Yellow	Yellow/Black	Glow in the dark
20 mm	50 mtr	28 rolls									○			

MegaTape 470 Double-sided cloth

The 470 is a double-sided cloth tape with extremely high adhesive strength on both sides. Designed for indoor use on demanding surfaces where maximum grip is required. This tape stays put where others give up. It tears easily by hand for quick handling. For applications where clean removal is crucial, we recommend the MegaTape 450.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans-parant	Yellow	Yellow/Black	Glow in the dark
50 mm	25 mtr	27 rolls									○			

MegaTape 480 Double-sided cloth

The 480 is a double-sided cloth tape specially developed for surfaces containing plasticisers. Where standard tapes often fail or lose strength, the 480 provides reliable adhesion. It tears easily by hand and is ideal for indoor use, such as securing carpet to PVC or other plastic-based materials.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans-parant	Yellow	Yellow/Black	Glow in the dark

SPECIAL TAPE

Special tapes for specific situations

Sometimes the job needs more than standard. Whether it's glow-in-the-dark markings, flame-retardant or taping over cable runs without touching the cables - our Specials are made for it. From tunnel to flame-retardant tape, from glow to full black-out - each type is designed for a purpose. Smart, reliable and ready when you are.

MegaTape 910 Flame retardant

The 910 is a flame-retardant duct tape with a fully black finish - both the backing and adhesive are deep black, making it disappear completely in dark settings. This tape is ideal for high-temperature environments such as theatres, AV setups and technical areas. Thanks to its black-on-black construction, it leaves no distracting edges or reflections under stage lights or in TV productions.

50 mm	25 mtr	12 rolls	●											
75 mm	25 mtr	8 rolls	●											

MegaTape 930

The 930 is a glow-in-the-dark duct tape, specially designed for situations where temporary visibility in the dark is crucial. Ideal for marking escape routes, stair edges or backstage areas with little to no light. This tape is strong, easy to tear by hand and reliably stays in place. A smart blend of safety and functionality.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- sparant	Yellow	Yellow/ Black	Glow in the dark
25 mm	10 mtr	24 rolls												
50 mm	10 mtr	12 rolls												

MegaTape 950

The 950 is a tunnel tape with adhesive on both outer edges and an uncoated centre strip, making it ideal for taping over cable runs. It adheres firmly to the floor while leaving cables untouched - keeping them protected and easy to remove. A practical solution for safe, tidy cabling in temporary setups.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- sparant	Yellow	Yellow/ Black	Glow in the dark
150 mm	25 mtr	4 rolls	●										●	

MegaTape 951

Like the 950, the MegaTape 951 is a tunnel tape with a non-adhesive centre section - but with a fully matt finish. This ensures the tape stays firmly in place without sticking to cables or ducting. Its matt surface prevents unwanted reflections from stage lights or camera setups, making it ideal for use on stage or in studio environments. A smart combination of protection, subtlety and flexibility.

Width	Length	Packaging unit	Colors											
			Black	Blue	Green	Grey	Orange	Pink	Red	White	Trans- sparant	Yellow	Yellow/ Black	Glow in the dark
